<p align="center">Electricity & Flight ~Rose</p>	<p align="center">\$ 45.00</p>	<p align="center">\$ 39.50</p>	<p>"This is a combination class that introduces two fun science topics. (This class is geared toward 2nd-4th graders.) First Semester: Electricity! It's shocking stuff! In this class, students will learn about electricity. What is it? What can it do? They will learn the properties of the different components of a circuit - like switches, resistors and the photoresistor - and the effects they have on the flow of electricity. They will learn how to use these components in conjunction with one another to build a circuit that performs a specific function - like an alarm or a light switch. Built around Snap Circuits and supplemental experiments, this lab style class will open their eyes to the world of electricity around them and challenge them to see the possibilities before them! Second Semester: Why does a plane fly? Why doesn't a brick fly? We will learn the necessary components of flight - lift, gravity, thrust and drag. We will learn what different features, like elevators and ailerons, do. We will learn the significance of the incline of a plane's wings. We will do all of this by building paper flying machines also known as paper air planes! At the end of the semester, students will take everything they've learned, design a custom plane and compete in a classroom showdown! "For non-symptomatic students masks are encouraged but not required, unless parents require them. I do ask students who are sick or have a cough to stay home. And students who have allergies flaring to wear a mask, as this is often indistinguishable from the beginning of infection.</p>	<p>This class is geared toward 2nd-4th grade. So, students must be able to read and write independently to complete worksheets.</p>	<p align="center">~1 hr.</p>	<p align="center">None.</p>
<p align="center">Epic Art ~Waller</p>	<p align="center">\$ 30.00</p>	<p align="center">\$ 39.50</p>	<p align="center">Study the elements of art and the principles of design while doing EPIC art projects! SO. MUCH. FUN! We'll use paint, oil pastels, clay and LOTS of other materials.</p>	<p align="center">Listen and follow directions.</p>	<p align="center">None.</p>	<p align="center">Paint shirt.</p>

<p align="center">Exploring Creation With Earth Science ~Boyd</p>	<p align="center">\$ 50.00</p>	<p align="center">\$ 39.50</p>	<p align="center">Let's learn about our home planet and how we are loved by a God who created everything to work together to make life possible. Your student will study clouds, dirt, the atmosphere, geosphere, hydrosphere and other topics....including why our planet is the only known planet with life! We will use Apologia's new textbook and junior notebooking journal as the guides for our studies.</p>	<p align="center">Normal basic lower elementary skills</p>	<p align="center">1 or less hrs.</p>	<p>Apologia: Exploring Creation With Earth Science Textbook - ISBN-13: 9781946506726; Apologia Exploring Creation With Earth Science Junior Notebooking Journal - ISBN-13: 9781946506740. Basic supplies including pencils, eraser, glue stick, scissors and something to color with.</p>
<p align="center">Hands-On History ~May</p>	<p align="center">\$ 60.00</p>	<p align="center">\$ 39.50</p>	<p align="center">Students will explore medieval history with fun crafts, games and projects in Hands-on History. This class pairs well with Story of the World Volume 2. This year, we will learn about the feudal system, create catapults and trebuchets, discover the complexities of castles and much more. We will keep a vocabulary bank and timeline book to document our adventures.</p>	<p align="center">None.</p>	<p align="center">None.</p>	<p align="center">Materials provided by instructor.</p>

Sing & Move Music Class ~Farr	\$ 20.00	\$ 33.75	<p>Let's learn action songs, sing Scripture melodies and quote traditional and silly rhymes – parents and children together! Hearing music, learning and singing songs, acting out the words and seeing others move - all at the same time - will help your child increase their memory, concentration, motor skills and hand-eye coordination. Children love using their imagination with fingerplays and catchy songs from singing about animals to transportation, which in turn builds confidence and creativity as well as reinforces language skills.</p> <p>This class is a fun way to learn to follow directions as well as to understand when to be quiet, listen, take turns, cooperate, stop or sit and then get up to and SING AND MOVE.</p>	Desire to join in and sing and move with the class.	0 hrs.	Teacher will provide.
